

Session Levels - PickMyTrade + TradingView + Tradovate Setup

Automate Session Levels strategy alerts to Tradovate via PickMyTrade

Overview

TradingView Strategy -> Alert (webhook) -> PickMyTrade -> Tradovate order

TradingView decides WHEN to trade. PickMyTrade routes HOW the order hits Tradovate.

Prerequisites

- TradingView Pro, Pro+, or Premium (webhooks required)

- PickM

Step 1 - Connect Tradovate in PickMyTrade

- 1. Log in at pickmytrade.trade

- 2. Go

Step 2 - Generate the alert in PickMyTrade

- Open Create Alert / Generate Alert

- Choos

Step 3 - Create the alert in TradingView

- Load Session Levels on chart

- Creat

Step 4 - Verify before live

- Check PickMyTrade alert logs for received JSON

- Confir

Session Levels live notes

- Entries at bar close = up to 5 min delay on 5m chart

- Use F

Troubleshooting

- Alert fires, nothing in PMT: webhook URL or JSON wrong

- Order

Recommended rollout

- Demo + 1 MNQ for one week

- Comp
